TERMS AND CONDITIONS

- A set fee of \$500 will be charged per meter and collected annually.
- Tap fees must be paid for service address.
- Tap and meter box must be installed.
- MPW will install one construction meter for every 10 houses.
- Additional construction meters must be approved by MPW Engineering Department.
- Construction meters will not be relocated. A new application and contract must be submitted for a new location.
- Water from construction meters may be used for construction and irrigation.
- Under no circumstances should the water from construction meters be used as potable water.
- Property Owner/Developer is responsible for the construction water meter. The future homeowner, home builder, and/or contractor is not held liable by MPW for any damages or non-compliance to this contract.
- Future homeowner, home builder, and/or contractor must set up separate MPW account and pay meter connection fees before MPW will sign off on a building permit and/or provide domestic water and wastewater service.
- Contract expires 12 months from approval date.
